COVID-19 brought our world and, especially, our businesses to a grinding halt. We left our workplace to “shelter-in-place” at home. Our workplace no longer seems like a safe haven. Upon our return, we will be hyper-vigilant about personal space, touch points and contagions now that we have become accustomed to disinfecting and social distancing.

This is the perfect time to be thinking about and implementing ideas to make the workplace healthier and safer. This is a checklist to be used as a guide for returning to a healthy workplace.
Step 01:

MINIMIZE & SANITIZE TOUCH POINTS

- 1. Reception Area
- 2. General Work Area & Offices
- 3. Conference and Meeting Rooms
- 4. Break Rooms
- 5. Bathrooms
- 6. Overall

Step 02:

CHECK & MAINTAIN INDOOR AIR QUALITY

- 1. Change Air Filters
- 2. Get an Air Quality Test and Sensors
- 3. Don’t Block Air Vents
- 4. Maintain Proper Levels of Humidity
- 5. Use Entrance Mats
- 6. Use Plants
- 7. Open the Windows
- 8. Keep the Workplace Clean

Step 03:

PROMOTE PERSONAL RESPONSIBILITY & SOCIAL DISTANCING

- 1. 6' Spacing Visual Cues
- 2. Social Distancing Desk Shields
- 3. Wash Hands Often
- 4. Stay Home If Sick
- 5. Hand Sanitizers & Tissues
- 6. Personal Items
**Step 01:**

**Reception Area**

**MINIMIZE & SANITIZE TOUCH POINTS**

- 1. Disinfect/Replace Door Handles with Antimicrobial Handles
- 2. Disinfect/Replace Door Pulls with Hand-Free Pulls
- 3. Disinfect/Replace Light Switches with Antimicrobial Switches and Coverplates
- 4. Provide Acrylic Dividers Between You and Guests for Protection
- 5. Contain Deliveries - Provide Staging Table to Limit Direct Contact with Packages

Noteology Antibacterial Hand Rub
https://www.notefragrances.com/products/hand-rub
ENSURE THE FOLLOWING STEPS ARE TAKEN

1. Change Air Filters
   MERV 17-20 rated filters are proven to catch viruses like H1N1, SARS, and Influenza. The theory being it will have the same effect on COVID-19 and coupled with UV light should kill it in the air stream. Change air filters every 6-12 months.

2. Get an Air Quality Test
   Have an expert check ducts and ventilation to rule out mold, leaks, etc. Install Air Quality Monitors.

3. Don’t Block Air Vents
   Do not put boxes or furniture on vents. Keep vents clear to circulate air. Ceiling vents are easier to keep clear.

4. Maintain Proper Levels of Humidity
   The proper humidity helps keep dust mites, molds and other allergens under control.

5. Use Entrance Mats
   85% of the dirt in your building enters on the soles of people’s shoes. One square yard of commercial carpet can accumulate up to one pound of dirt in a week. Just 5’ of entrance mat can stop 40% of the dirt.

6. Use Plants
   Plants increase productivity. They also absorb toxins in the air and release oxygen.

7. Open the Windows
   Let in some fresh air from time to time and clear out the stale air.
Step 02:

Indoor Air Quality

ENSURE THE FOLLOWING STEPS ARE TAKEN

- 8. Keep the Workplace Clean
   Dirt and dust build up fast so regularly vacuum, sanitize, get rid of garbage. Get your office professionally cleaned and discuss post-COVID-19 cleaning protocols.

- 9. Check Into Tax Breaks and Other Government Incentives
   HVAC equipment is now fully deductible in the tax year purchased through 2022. Consult your accountant and experts on the tax laws.

Prepare to promote personal hygiene in the wake of the pandemic. We are all responsible for minimizing risks to each other.

1. **6’ Spacing Visual Cues**
   Consider returning to work on staggered days based on capacity and letting some workers continue to be remote. Consider the spacing of desks and office equipment using visual cues to encourage the recommended 6’ distancing. Visual cues can be temporary (cardboard or paper cut-outs) or more permanent (floor graphics).

2. **Social Distancing Desk Shields**
   Consider applying Social Distancing Desk Shields for open office seating and hot desking areas like this product line from Innovant. Such viable, near term product solutions make an existing office environment more comforting to staff. Shields can be temporary or permanent.

3. **Wash Hands Often**
   This is one of the most effective ways to kill bacteria and viruses and keep them from spreading. Provide touchless soap dispensers and towel dispensers, as mentioned in Step 01.

4. **Stay Home If Sick**
   Let your staff know to stay home and not infect others if they are sick. Encourage this for planned guests and visitors, too. Sneezing and coughing can still occur so make sure it is into the crook of the arm—the average sneeze or cough can send around 100,000 contagious germs into the air at up to 100 miles per hour.
Step 03: Promote Personal Responsibility & Social Distancing

Prepare to promote personal hygiene in the wake of the pandemic. We are all responsible for minimizing risks to each other.

- 5. Hand Sanitizers & Tissues
  Keep hand sanitizers and tissues at desks or placed throughout the office. Place on tables and desks or wall mount.

- 6. Personal Items
  Promote staff using their own writing instruments and limiting sharing. Consider labeling personal items. Consider providing masks for staff who would feel more comfortable wearing one.
